NETRA • EYES THAT SEE THROUGH

Forensic Verdict: EDITED VIDEO (CONFIDENCE 71.9%) — RISK: MEDIUM

|                     |                                                                 |                       |                                  |
|---------------------|-----------------------------------------------------------------|-----------------------|----------------------------------|
| Target Subject:     | Bhavish Aggarwal                                                | Analysis Timestamp:   | 2026-09-03 23:03:11 UTC          |
| Video Telemetry:    | 1620x1080 @ 30.0 FPS (4.93s, 148 frames)                        | Origin / Geolocation: | Mumbai, Maharashtra (ASN-55836)  |
| Cryptographic Seal: | SHA-256: 9a1e318fd20af25bd4971d36a7a52613d506...<br>[CERTIFIED] | Frames Audited:       | 17 Sampled Frames (Listed Below) |

| Detector Subsystem (Merged Ensemble)                                                    | Anomaly Index        | What the Model Detected                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Spatial SBI Detector (EfficientNet-B4)<br>[TRAINED CHECKPOINT — spatial_model_best.pth] | 85.3%                | EfficientNet-B4 fine-tuned on Self-Blended Images (SBI). Mean fake probability across 17 frames. Blending boundary seam artifacts detected along facial perimeter with high confidence.                                           |
| 2D-DCT Frequency Domain Analyzer<br>[SPECTRAL SEAM ANALYSIS — FFT/DCT]                  | 31.5%                | 2D Discrete Cosine Transform boundary-to-inner frequency energy ratio. DCT frequency distribution consistent with natural camera optics and lighting.                                                                             |
| Audio Vocoder Forensics (Wav2Vec2)<br>[ACOUSTIC PROSODY DISCRIMINATOR]                  | N/A — No audio track | Video has no audio track — audio channel safely gated out of fusion (weight=0).                                                                                                                                                   |
| GenD Foundation Model (ViT-L/14)<br>[OFFLINE — excluded from fusion]                    | N/A                  | ViT-L/14 CLIP foundation backbone (17 crops). Hugging Face remote weights not downloaded locally. Fallback simulator excluded from fusion to maintain strict forensic integrity — SBI trained checkpoint + DCT carry the verdict. |

1. Flagged Forensic Keyframe Visual Evidence (Multi-Frame Localization Gallery)

|                                                                                   |                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                     |
